#### Render Sponsor Lecture Check-In

## how to win web.lab

Kenneth Choi

# plan out your web app

#### How We Taught Catbook:

HTML + CSS (page content, structure, and design)

Client-Side JS (interactivity, API calls)

Server-Side Node/Express JS (creating routes, serving pages)

Databases using MongoDB and Mongoose (creating APIs, accessing and editing data)

Authentication (creating users and accounts, secure login)

Advanced Features (sockets, games, machine learning & deployment)

#### How We Designed Catbook:

# Full-Stack Design, Feature-by-Feature

#### Full-Stack Design, Feature-by-Feature

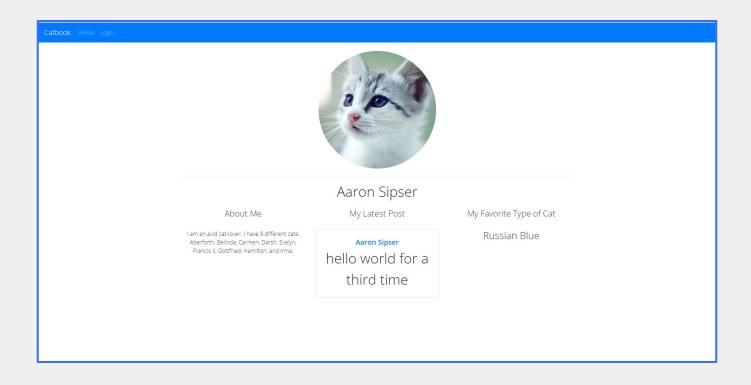

Full-Stack: Design with all the layers of the app in mind Front-End, Server-Side, Database

Feature-by-Feature: Design each feature independently

case study: how did we actually

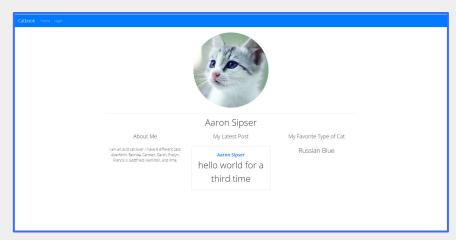

design catbook?

## Example: Profile

#### Example: Profile

- Creating detailed wireframes
- Creating a component tree
- Designing APIs
- Designing database schemas

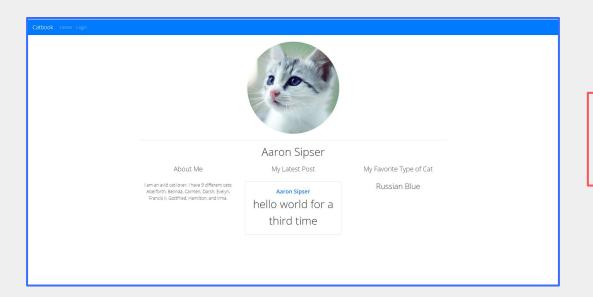

#### Example: Profile - Feature

Visual display of information about a user

### Example: Profile - Wireframing

Feature: Visual display of information about a user

How to Design: Ask "What do we want to show?"

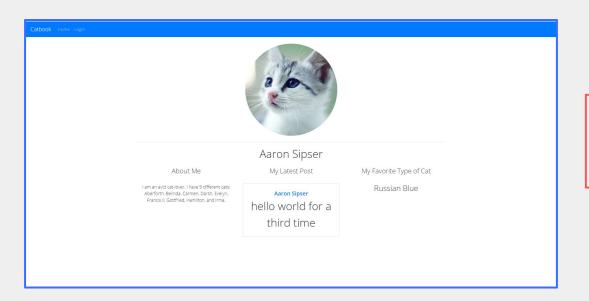

TODO:
Figma
Figure out what
redirects where

#### Example: Profile - Front-End

Feature: Visual display of information about a user

How to Design: Ask "How to translate to frontend? (React)"

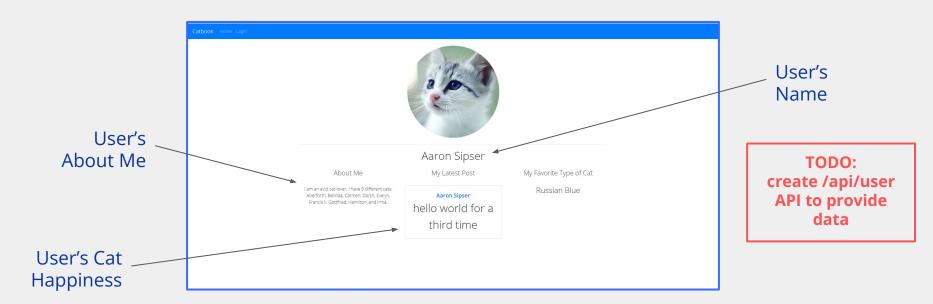

TODO: create profile.css, profile.js

#### Example: Profile - Server-Side

Feature: Visual display of information about a user

How to Design: Ask "What does the client need?"

#### Example: Profile - Database

Feature: Visual display of information about a user

How to Design: Ask "What data do we need to store?"

#### User:

- name
- cat\_happinness
- about\_me

- . . .

TODO: create a mongoose schema/model

### Example: Profile

#### Visual display of information about a user

TODO: create profile.js, profile.css TODO: create /api/user API to provide data TODO: create a mongoose schema/model

#### Your Website!

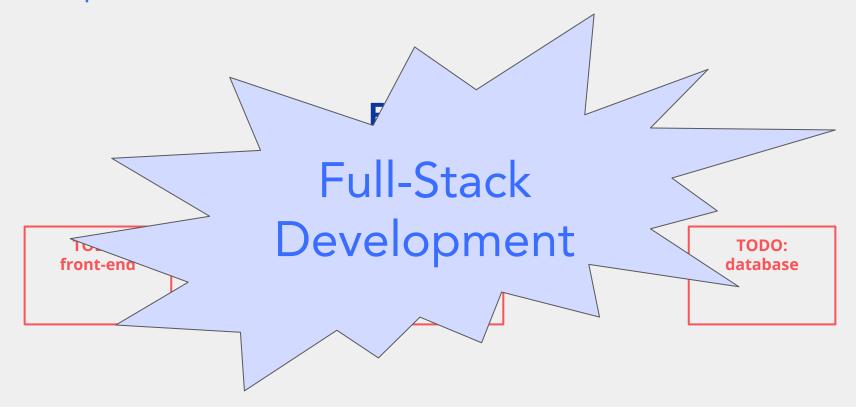

#### **Your Feature**

TODO: front-end

TODO: back-end

TODO: database

### Example: Profile

#### How We Designed Catbook, Full-Stack:

Feature

Front-End

Server-Side

Database

#### **Profiles**

Profile page with name, description, cat happiness

/user API request for above info

User MongoDB Schema/Model

#### **Stories (posts)**

Card with name, story, comments

/stories API request for above info

Story MongoDB Schema/Model

#### **Comments**

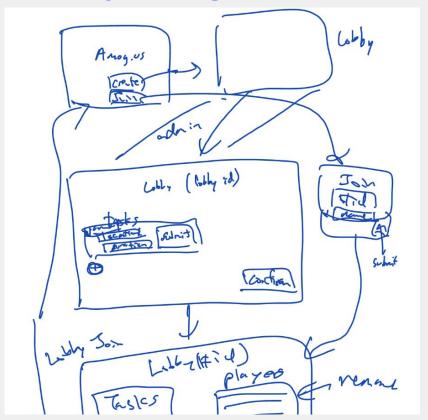

Card footer with name, comment

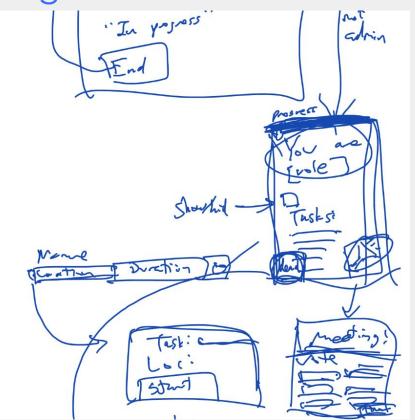

/comment API request for above info

Comment MongoDB Schema/Model

# Planning ahead will help you stay organized and improve productivity!

### Soon, you'll go from something like this...

#### ...to something like this...

## Amog.us

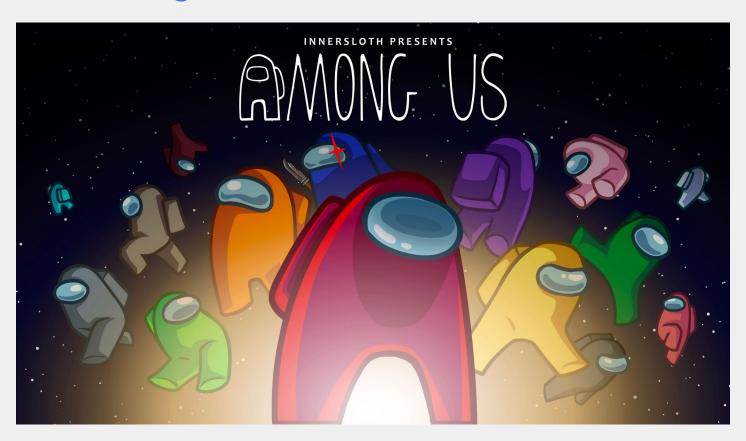

Name

Game ID (Leave blank for create!)

**CREATE** 

**PLAY** 

### ...to something like this!

## keep your plan updated

Your plan should serve as good documentation and a method of communication between your team.

# As your team makes decisions, your plan should reflect this.

# communicate with your team

divide up the work

# focus on that one killer feature

## quality > quantity

Join social game lobbies from any browser, no install required

Raise your magikarp to jump higher than anyone else's

# use your team's strengths

Team of 3 artists make a beautiful hand-drawn game

#### test test test

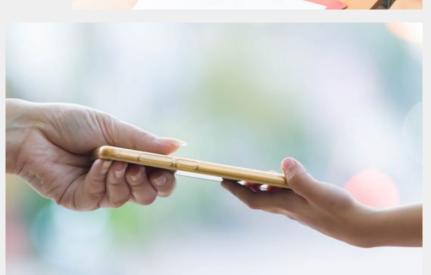

# build. test. polish. repeat.

## when you're stuck...

> yeah, what's up - Enrique Casillas, 5:45 am

or what about office hours

or what about office hours

hackathon **TONIGHT** 7pm-1am IN 32-082 and online @ weblab.is/q

### Good luck!

#### Reminders

- Milestone 2 (MVP) is due THIS COMING WEDNESDAY, Jan 24 at 6PM ET sharp.
  - all milestones required to compete or get credit.
  - do NOT leave this till the last minute
  - weblab.is/milestone2
- Hackathon in 32-082 TONIGHT 7PM 1AM ET!
  - o food and drinks:0 🍕 🥤
  - ★Come at 7★ for Nick's v cool mini-lecture on how to start + design your project!
- Subject evals open next week 👉 👈
  - Special stickers for ppl who fill out their evals (screenshot the page)
